# Information Plan of the Faculty of Geography and Environmental Sciences on the Sustainable Development Goals for Displaced Persons and Refugees

Almaty 2025

## Information Plan of the Faculty of Geography and Environmental Sciences on the Sustainable Development Goals for Displaced Persons and Refugees

### SUSTAINABLE DEVELOPMENT GOALS

**The goal of this plan:** to enhance the resilience of socially vulnerable groups to climate-related, environmental, and humanitarian risks; to support their adaptation to new socio-ecological conditions; and to foster a systematic culture of safety. This program format aligns with internationally recognized practices adopted by high-ranking universities such as the University of Geneva, Lund University, and University College London (UCL).

**Significance:** This initiative strengthens the university's social responsibility and ensures alignment with international humanitarian principles and UN standards. Moreover, it constitutes an official indicator of the university's contribution to the UN Sustainable Development Goals, demonstrating its commitment to regional resilience, social inclusion, and humanitarian-oriented development.

#### Plan:

№	Topic	Goal	Short Description	Time
1	Introductory Information Session on UN Humanitarian Programs and the Sustainable Development Goals (SDGs)	To improve awareness of displaced persons regarding UN humanitarian frameworks and sustainability principles, supporting social inclusion and safe adaptation.	The session explains SDGs, humanitarian assistance mechanisms, and essential rights and responsibilities.	Q1

2	Academic Lecture on Climate-Related Health Risks and Fundamentals of Environmental Safety	To build capacity in recognizing climate-induced health risks and adopting environmental safety practices.	Topics include air quality, climate stressors, hygiene, and preventive measures.	Q2
3	Practical Session on Safe Behaviour in Natural Hazard Conditions	To strengthen the ability to act safely in environmentally hazardous situations and reduce vulnerability.	Covers floods, landslides, earthquakes, storms, and related safety guidelines.	Q3
4	Integration Eco-Forum for Displaced Persons and Local Communities (SDG Integration Eco-Forum)	To enhance communication and cooperation between displaced persons and local communities.	The forum includes discussions, project presentations, and SDG adaptation strategies.	Q4
